Architect / Developer

We are looking for an architect / developer to work on our billing and electronic payments platform.

Company location : Brabant-Wallon

Status : employee

Our Company

Teal IT is a FinTech company developing an innovative alternative in the field of electronic invoicing and payments. It is compliant with rigorous regulations of the financial sector, yet you will be surprised, among other things by our self-management organization. At the heart of all our activities are trust and transparency towards our employees, customers and investors.

We are specialized in the development of an electronic invoicing and payment product called Digiteal.

Created in 2015, Teal IT is a startup. This is an opportunity to participate in the early stages of the adventure with us.

Your role within Digiteal

As an architect / developer at Teal IT, you participate with members of the project team in the complete development cycle. This cycle includes the requirements analysis, the design, the development, the testing and finally putting into production with a particular regard to the quality delivered.

You will accompany the sales, advise and actively participate in the achievements sometimes autonomously, sometimes as a team. Some trips abroad may be necessary but most customer contacts will be remote (phone, email, video conference).

You are capable of providing a helping hand on different levels. From setting up servers and deploying on AWS to developing the frontend and backend.

Your profile

You have a bachelor's degree, master's degree in IT orientation or equivalent experience.

You have a solid experience of at least 3 years as a Java / JEE / Mobile developer.

You want to get involved in a business project strongly focused on collective intelligence and self-management. You are able to be autonomous but also to be a teamplayer.

You master the following technical fields:

- JEE (JMS, JPA,...)
- Javascript (Angular,...)
- Spring (MVC, Batch, Data, Boot,...)
- REST/SOAP
- XML and XSD
- Unit testing (JUnit, Mockito,PowerMock,...)
- SQL
- HTML, CSS

Nice to have:
- AWS experience
- Typescript
- Ionic
- Attentive to security
- Webpack, RequireJS,..

Master the majority of the following concepts and methodologies:

- Object Oriented Programming
- Architecture and Design Patterns
- UML
- Design of DB's (Data modeling, diagrams)

You have professional working proficiency in English. The code and documentation are in English.
Additional points if you also know : FR/NL/DE

Our offer

A very complete package, attractive and corresponding to your knowledge and experience.

The opportunity to participate in an innovative european business project.

A fulfilling work in a dynamic company respectful of the human person.

An environment that promotes learning and discovery.

You're the one!? hello@digiteal.eu
